

Moisture Seperator HMS

This high quality brand belongs to the product group "pressure blast systems". Only the perfect configuration and match of all system components in a blast machine enable maximum blasting efficiency. Therefore Clemco offers an extensive and complete range of quality products.

Moisture Seperator HMS

The moisture separator is the first inlet point for compressed air to the blast machine and eliminates remaining moisture. It does not replace the general need for dry air supply to the machine. Moisture in a blast machine system causes increased wear and clogging of media.

Area of application

dehumidification for blast machine air supply
